

ICE Reports 16th Detained Death of 2026 at Winn Correctional Center in Louisiana

Alejandro Cabrera Clemente, a 49-year-old man from Mexico, died on April 11 at a private prison in rural Louisiana. The pace of one death every 6 days continues to hold.

Alejandro Cabrera Clemente, a 49-year-old man from Mexico, died on April 11, 2026 at the Winn Correctional Center in Winnfield, Louisiana, according to [an ICE press release](#) published today. He is the 16th person to die in ICE custody since January 1, 2026. Here are a few key things to know about this latest death. I've confirmed with others that there might be some issues seeing the press release for some reason; I'll include a screenshot below.

First, ICE's press releases are not the full story. ICE's official narrative says that Cabrera was found unresponsive at the facility. Staff initiated emergency measures and he was transported by ambulance to Winn Parish Medical Center, where he was pronounced dead at approximately 8:51 AM. But this is likely not the full story. I recently [sat down with St. John Barned-Smith and Ko Lyn Cheang](#), the San Francisco Chronicle reporters behind a [major investigation](#) into all 48 deaths in ICE custody since January 2025. They obtained death reports, autopsy records, and medical records and sent them to 14 physicians for independent review. In at least 17 of the 32 cases where sufficient documentation was available, doctors concluded that without delays or failures in medical care, the person might still be alive.

Second, about that Winn Correctional Center... The facility where Cabrera died deserves attention. [Winn Correctional Center](#) is a privately operated prison in rural Winn Parish, Louisiana, one of the poorer parishes in one of the poorer states in the

country. Winn is in what some refer to as “detention alley”—a hub of immigrant detention facilities. Learn more at:

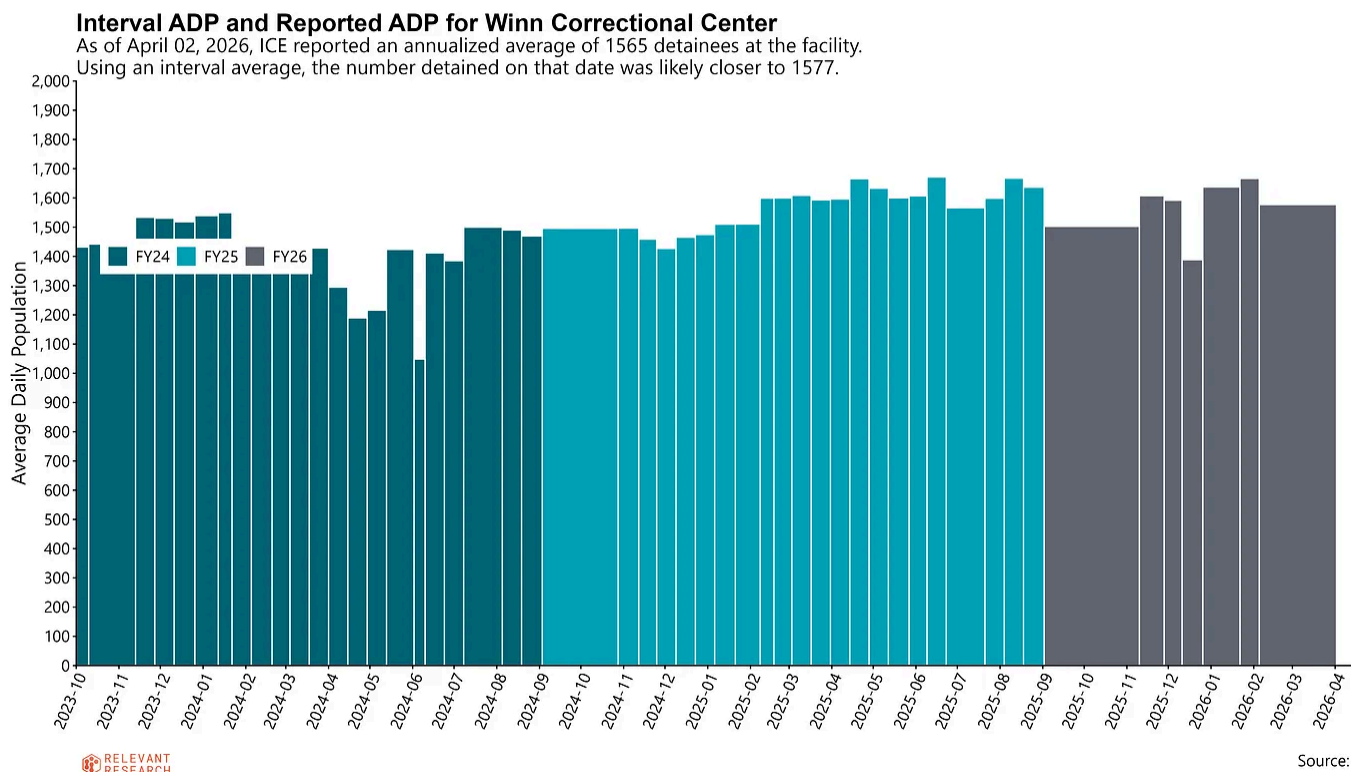

Louisiana: A Growing Hub in ICE's Expansion of Immigrant Detention

[Read full story](#) →

Winn also has a long and troubled history. It was the subject of a landmark investigative piece by Shane Bauer, who went undercover as a prison guard there and [published his findings in Mother Jones in 2016](#) and later expanded into his memoir [American Prison: A Reporter's Undercover Journey into the Business of Punishment](#). His account described violence among inmates, poor medical and mental healthcare, mismanagement, and a facility culture shaped by chronic understaffing and lack of training. At the time of Bauer's investigation, the facility was operated by Correction Corporation of America; it has since been taken over by LaSalle Corrections, a Louisiana-based private prison company.

According to the latest data from Detention Reports, the facility holds about 1,577 people. This includes [Carlos Della Valle](#), husband of Angela, a US citizen [who has been vigorously advocating for Carlos's release](#) over the past several months.

Third, let's do the math again. The math on the pace of deaths continues to be what it has been. January 1 to April 11 is 101 days. Sixteen deaths over 101 days works out to one death every 6.3 days—still hovering near the one-death-every-six-days pace that I [previously noted](#) with the 15th death and that has not meaningfully changed. In context, 2025 was the deadliest year for ICE detention in more than two decades, with 32 deaths. We are four months into 2026 and already halfway there.

$$\frac{\text{April 11, 2026} - \text{January 1, 2026}}{16 \text{ detained deaths}} = \frac{101 \text{ days}}{16 \text{ detained deaths}} = 6.3 \text{ days per death}$$

A running table of detained deaths during the current Trump administration is below and a screenshot of the press release is available below that.

ICE Detainee Deaths Under Trump Administration

ICE criminal illegal alien detainee passes away in Louisiana

NEW ORLEANS — Alejandro Cabrera Clemente, a 49-year-old criminal illegal alien from Mexico, passed away in ICE custody. His criminal history includes **convictions for disorderly conduct, drug possession and probation violation and an arrest for domestic violence**. On April 11, 2026, Cabrera was found unresponsive, staff at Winn Correctional Center immediately called a medical emergency and began life-saving measures. Emergency Medical Services transported Cabrera by ambulance to Winn Parish Medical Center (WPMC) for advanced medical treatment. Upon arrival at WPMC, medical staff continued resuscitative efforts. Despite life-saving efforts, at approximately 8:51 am, an onsite physician at WPMC pronounced Cabrera deceased.

Cabrera entered the United States illegally and without inspection over 25 years ago. Cabrera also has criminal charges for domestic violence, failure to appear, disorderly conduct and a traffic offense, dispositions pending.

Cabrera was arrested by ICE on Jan. 8, 2026 in Chattanooga, Tennessee and was transferred to Winn Correctional Center on Jan. 13, 2026. He was held in ICE custody pending removal proceedings before the Executive Office for Immigration Review.

ICE makes official notifications to Congress, nongovernmental organization stakeholders and the media upon official reports of in-custody alien deaths and posts news releases with relevant details on ICE's public website. You may access this information in ICE.gov's [Newsroom](#). Congressional requirements described in the DHS Appropriations Act of 2018 require ICE to publicize all reports regarding in-custody deaths within 90 days. You may access these reports on ICE.gov's [Detainee Death Reporting page](#).

ICE is committed to ensuring that all those in custody reside in safe, secure and humane environments. Comprehensive medical care is provided from the moment individuals arrive and throughout the entirety of their stay. All people in ICE custody receive medical, dental and mental health intake screenings within 12 hours of arriving at each detention facility; a full health assessment within 14 days of entering ICE custody or arrival at a facility; access to medical appointments; and 24-hour emergency care. At no time during detention is a detained alien denied emergency care.
